SENIOR DEVELOPER – CAMERA HARDWARE AND SOFTWARE. TO JOIN OUR TEAM!

auvetech

YOUR RESPONSIBILITIES WOULD BE:

- Develop camera solutions for Auve Tech autonomous vehicles using C++ and ROS.
- End-to-end responsibility of developing and testing GStreamer pipelines using C++ and Python.
- Testing camera hardware and software on physical infrastructure.
- Development of a HIL solution for automated camera testing.
- End-to-end responsibility of ensuring the reliability of Nvidia Jetson platform.
- Write queries to evaluate camera availability and test results (SQL, Python, Flux or other).
- Own end-to-end roadmap of Auve Tech camera hardware and software development.
- Handle cooperation with external development partners.
- Achieving camera-related KPI-s.

WHAT DO WE EXPECT FROM YOU?

- Minimum 5 years of relevant experience.
- A degree or relevant professional experience in one of these fields: computer science, information technology, engineering or related.
- Minimum 5 years of hands-on experience with GStreamer.
- Knowledge of different camera protocols.
- Proficiency in C++.
- Hands-on experience working with Linux.
- Previous experience working in a data-driven environment.
- Being able to deliver features within specified time.
- Ability to work in a fast-paced environment with minimal supervision.
- Very good spoken and written English.
- Leadership capabilities.
- Nice to have: machine learning skills, CUDA or other GPU-accelerated processing methods, experience working with audio, working with profiling tools.
